AUBURN, MAINE

How to Save a Whole Year on Strawberries

By setting out Chaput's Superior Pot-Grown Strawberry Plant

By setting out Chaput's Superior pot-grown Strawberry Plant, as shown in illustration is much the best. The roots are all there, and good roots, too. If set out in Aug. or Sept. will produce a crop next June.

During July, August and September, we will supply pot-grown plants of most standard varieties at the following prices. We like to know your wants in this line as far ahead as possible. Price, 25 for \$1; 100, \$4.00.

SUPERB EVERBEARING STRAWBERRY

This is the largest and best everbearing strawberry now on the market. There never was a strawberry that is having the boom this one has. It is not only a fall-bearing strawberry but is equal to the best June strawberry to produce a crop of fruit at that time also. Plants set in April or May will bear the following August and continue to fruit till the ground freezes. The following spring and fall will give two crops more, making three crops in two years. Common June strawberry only one crop in two years. Price, \$1.00 per doz., pot-grown.

RASPBERRY PLANTS

Last of September and first of October is by all odds the best time to set raspberry plants.

Cuthbert, 50c per 12; \$1.25 per 100; \$10.00 per 1,000
King, 50c per 12; \$1.50 per 100.

St. Regis, 25 for \$1.; 100 for \$3.00; 1,000 for \$20.00

BLACKBERRY PLANTS

Snyder, 12 for 50c; 100 for \$3.00.
